

SERVING UP PATIENT SATISFACTION

When it comes to the hospital meal experience, Eversio 16 from Burlodge makes patients smile.

Based on patient satisfaction surveys and other studies, Eversio 16 from Burlodge received a positive rating with respect to:

- Meal presentation
 - Ease of use
- Overall food experience
- Environmental impact

PLEASING PRESENTATION

Eversio16 from Burlodge has a fresh, pleasing look when compared to worn crockery and utensils. Similarly, food provides an enhanced image when presented a bright background.

In a recent study, patients surveyed were pleased with the presentation of their meals on Eversio16.

- Approximately 88 percent rated the meal presentation as appealing.

EASY FOR PATIENTS TO USE

Lightweight yet durable, Eversio16 provides definite advantages to most patients taking their meals from a bedside table tray.

- Of the patients surveyed, 97 percent of the respondents said the disposable plate was easy to move around on the tray
- The majority of patients surveyed (89 percent) said the accompanying lightweight cutlery was easy to use.

ENHANCED FOOD QUALITY

Eversio16 from Burlodge works extremely well in specified rethermalization units, enabling the delivery of meals that are both ideal in terms of moisture consistency and temperature.

- Food retherms well in Eversio16, causing less drying and burning around the edges
- Of the patients surveyed, 93 percent said the temperature of their hot entrée was hot or warm.

ENVIRONMENTALLY FEASIBLE

An extensive study conducted by a third party environmental consulting firm has concluded that the disposal of Eversio16 has minimal impact on the environment.

- The total annual output that would be generated by three Eversio place settings, per patient, per day, represents approximately 2.5 percent of total hospital waste
- Although Eversio16 is recyclable, the amount of waste generated by this product may be too minor for hospitals to initiate a specific recycling program. Since Eversio16 compacts nets and compacts well, the annual output per hospital is cited to be equivalent to the consumption output of two to three normal households per year.
- Eversio16 one use wares does not utilize the energy or water resources required to sanitize permanent dishware.
